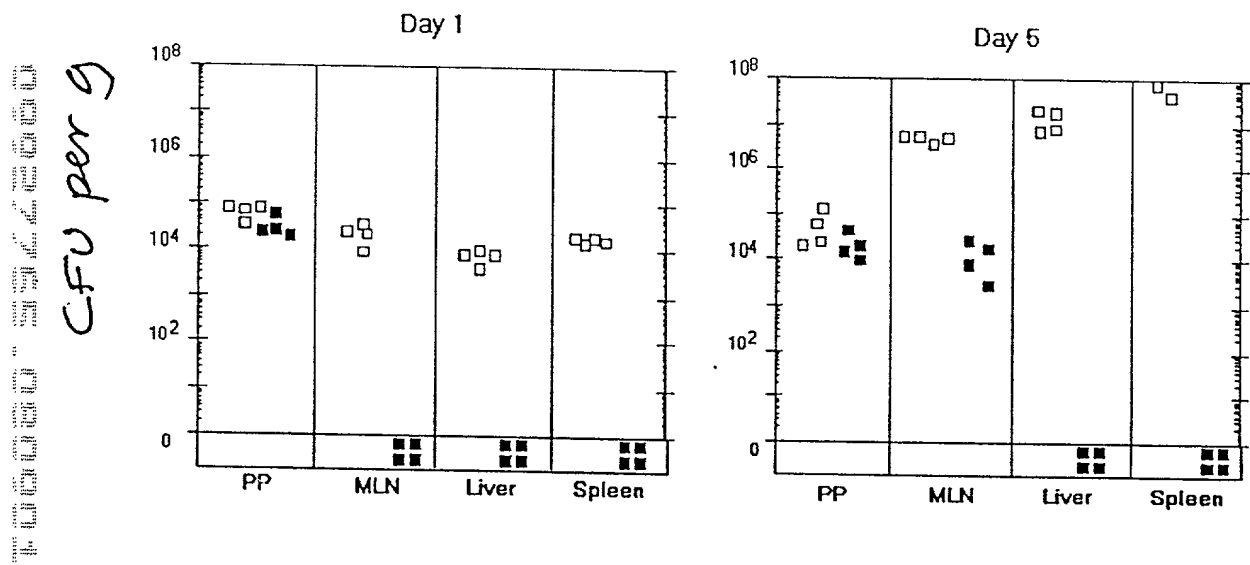

FIGURE 6

Figure 1 consists of four scatter plots arranged horizontally, representing the distribution of ^{125}I -anti-CD45 in four organs: PP, MLN, Liver, and Spleen. The y-axis is a logarithmic scale from 0 to 10^8 . The four groups are represented by different symbols: filled squares (Control), open squares (Anti-CD45 IgG), filled squares (Anti-CD45 IgG + anti-CD45), and open squares (Anti-CD45 IgG + anti-CD45 + anti-CD45). The Anti-CD45 IgG + anti-CD45 group shows the highest counts, particularly in the Spleen, reaching up to 10^8 .
